

(Paper's Draft) The Effects of an Aging Population on Military Recruitment and Retention: A Data-Driven Analysis

Lázaro Damasceno

January 15, 2026

Abstract

Resumo em PT-BR.

Abstract

Resumo em EN.

1 Introduction

2 Theoretical Framework

3 Methodology

3.1 Programming Language For Data Analysis

3.2 Datasets

4 Discussion

4.1 Univariate analysis

Figure 1: Military status distribution during the selection process (2007–2024)

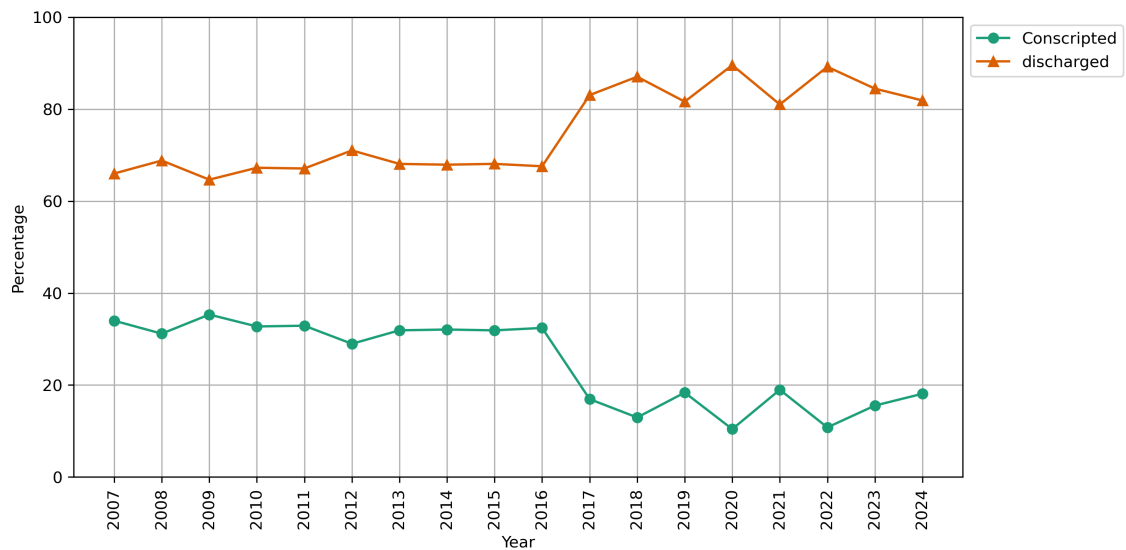

Figure 2: Evolution of educational attainment among conscription-liable men

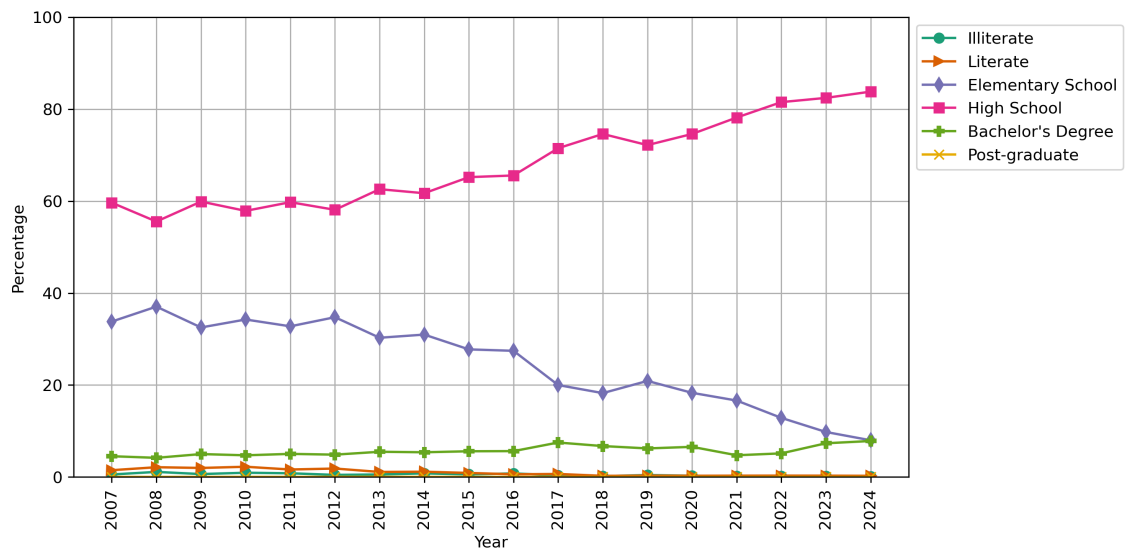

Figure 3: Residential distribution (urban vs. rural) of conscription-liable men

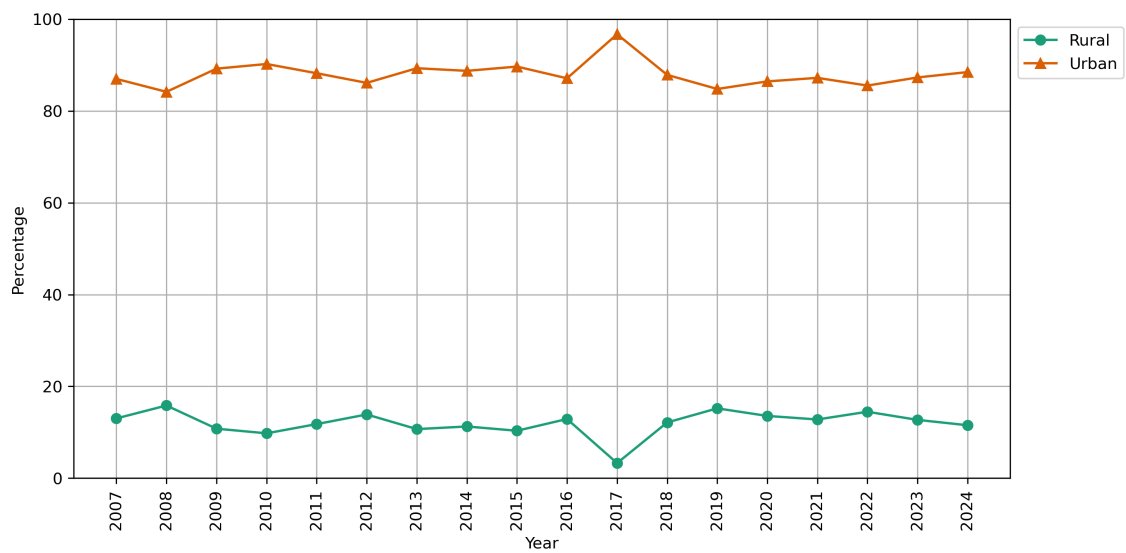

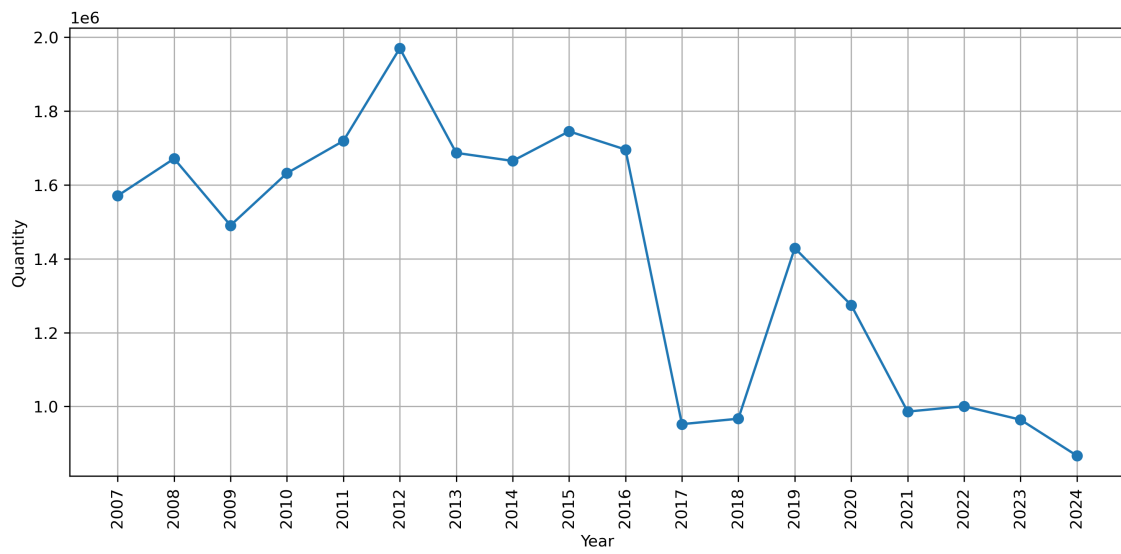

Figure 4: Annual number of conscription-liable men

5 Results

6 Final Remarks
